WOODWIND MOUTHPIECES: SELMER (PARIS) SAXOPHONE

SOLOIST SAXOPHONE MOUTHPIECES

The new "Soloist" mouthpieces for Alto and Tenor Saxophones designed by Selmer (Paris) have been inspired by the older "Soloist" model manufactured in the 1940's. Features include a round throat and traditional bead design. Precision tooled from a hard rubber bar, its inner chamber offers a nice direct volume with a warm, centered sound to play both jazz and classical repertoire. Available in facings C* through J. (For tip openings and facing lengths, see table below.)

SUPER SESSION SAXOPHONE MOUTHPIECES

The new Super Session saxophone mouthpiece has been specially designed for Jazz playing, but is also suitable for more academic playing. The outside shape makes it look a little different from the traditional Selmer (Paris) design; the inner conception of the chamber gives this mouthpiece very attractive playing features required by modern players.

A wide dynamic range enabling a great adaptation capacity to various contexts, an unequalled flexibility to switch easily from triple piano to fortissimo with maximum control and a generous and centered tone. Super Session is a high level professional mouthpiece which definitely improves any saxophone playing.
